Fuel Arrangements

As a result of customer feedback, and through special arrangement with the world's largest jet fuel re-seller, the Global Data Center now has an in-house Fuel dispatcher to arrange discount fuel services at over 1,500 strategic locations worldwide. The GDC's partnership provides you with convenient pre-arranged fuel at competitive prices. Call today for a no-risk fuel quote or to sign-up, contact Alastair Brownle at (888) 634-3330, ext. 7 or e-mail fuel@mygdc.com.

Westbound Oceanic Clearance for AFIS® and EPIC EASy™

Oceanic Route Clearance Authorization (ORCA) via datalink is now available for AFIS® and EPIC EASy™ equipped aircraft. The process allows aircraft to receive oceanic clearances from the Prestwick Oceanic Area Control Centre (Shanwick) via datalink, thereby minimizing voice communications with Air Traffic Control (ATC). A clearance request is initiated by the crew via the Flight Management

System (FMS). Shanwick sends the oceanic clearance, which is received by the crew via datalink. Voice readback of the clearance is required. Register your aircraft today through the Global Data Center (GDC). For further information and procedures specific to your datalink platform, please contact Abi Gonzaga at (281) 419-3668 or abilene.gonzaga@honeywell.com.

New AFIS® over Iridium Satellite service

Saudi Arabia-based operator, National Air Services / NetJets Middle East, launched the AFIS over Iridium service with successful communication in flight from Appleton, WI to Jeddah, Saudi Arabia in their Hawker 800XP. This was a collaborative effort with parties from various organizations including Gulfstream and ICG (International Communications Group). The service allows for satellite-based messaging system (short burst data) through the use of the Iridium network of low-earth orbiting (LEO) satellites. In order to register for services, note the IMEI (International Mobile Equipment Identity) number found on the ICG hardware. Honeywell will coordinate activation of the IMEI through a standard application process. It's as easy as a phone call! Contact Honeywell GDC at 888-634-3330 (or Intl 425-885-8100) extension 3 to subscribe for ICG Iridium services.

New Services

On Line Fax Services

We are now pleased to offer online fax services. This service is quick and simple to use. Simply choose your desired flight plans and weather and we will automatically fax them to you. The weather products available include Route Weather (METAR/TAF, NOTAMS, and Winds Aloft), Departure/Destination/Alternate weather, US Radar Summary chart, US Significant weather chart, North Atlantic Significant weather chart and Europe Significant weather chart, with more to be added. The simple interface takes just seconds to complete and allows you to designate any fax delivery address such as a hotel, FBO or your operations. This new feature is just one of many that GDC is providing in an effort to offer you the most comprehensive data link and flight planning service available. Call for more details and a live demo.
