

GDC Service Cancellation Request

Pursuant to the Global Data Center Services Agreement Terms and Conditions, paragraph 12, the undersigned hereby gives thirty (30) days notification of intent to cancel services.

The undersigned further understands the impact of this cancellation and agrees to disable the datalink unit's communication capability. If aircraft ownership is retained and transmissions (position reports, OFF/ON reports, etc) are received by the GDC, the Subscriber shall continue to be responsible for charges incurred and invoiced.

If GDC services are being cancelled due to the sale or transfer of the aircraft and the Subscriber wishes to retain the registration number for future use, it is the Subscriber's responsibility to have the datalink unit reconfigured prior to release of the aircraft.
